

AMERICA'S #1 MUSCLEBUILDING CREATINE

MOST POWERFUL HARDCORE CREATINE PILL IN EXISTENCE!

MOLECULARLY ENGINEERED TO INDUCE RAPID GAINS IN MUSCLE SIZE AND STRENGTH!

INCREASE MUSCLE FIBER PROTEIN CONTENT BY 58%!

IMMEDIATELY RECHARGES CREATINE RECEPTORS BY NEUTRALIZING REACTIVE OXYGEN SPECIES (ROS)!

WORLD'S MOST POWERFUL HARDCORE CREATINE PILL

NEW! NOW WITH...
 MOLECULAR HYPERPERMEABILITY TECHNOLOGY™
 TEST SUBJECTS INCREASED MUSCLE FIBER PROTEIN CONTENT BY 58%!

MUSCLETECH
CREAKIC HARDCORE
 MOST POWERFUL MUSCLEBUILDING CREATINE PILL

AMERICA'S #1 MUSCLEBUILDING CREATINE PILL
 30 CAPSULES (120 G) (30 DAY SUPPLY)

CREAKIC Hardcore is the only creatine pill designed to deactivate the harmful effects of ROS and create the perfect environment for maximum muscle creatine absorption, which means more muscle!

REACTIVE OXYGEN SPECIES ATTACK YOUR MUSCLE CELLS AND CAN INHIBIT CREATINE FROM ACTUALLY REACHING YOUR MUSCLES!

ROS are highly toxic molecules that can exist in your body in a variety of forms. These can include hypochlorous acid, superoxide anions, hydroxyl radicals, peroxyxynitrite, singlet oxygen and hydrogen peroxide. The devastating effects of ROS actually hit bodybuilders harder than your average couch potato. High levels of ROS are elevated even further every time you blast through a workout. This could slow the progress of the hard-trainer because ROS greatly weakens the integrity of the muscle membrane, causing cell receptor function to be disrupted. Disrupting cell receptor function can impair muscle creatine uptake and severely limit muscle growth.

By attacking ROS, CREAKIC® Hardcore works to inhibit it from destroying the integrity of your muscle membranes. Ultimately, this creates a very clear and efficient path for CREAKIC Hardcore's biomedically engineered form of creatine to enter your muscle cells. In a 12-week study, test subjects consuming the key ingredient in CREAKIC Hardcore increased muscle fiber protein content by an amazing 58 percent – not water gain, but pure, hardcore muscle!

THE REVOLUTIONARY BREAKTHROUGH OF CREAKIC HARDCORE

ROS molecules being NEUTRALIZED by CREAKIC

Muscle Cell

CREATINE molecules entering the muscle receptor

Maximum CREATINE levels

CREAKIC® Hardcore is scientifically engineered to neutralize a wide array of inescapable training-induced Reactive Oxygen Species (ROS) to ensure uninterrupted transport of its powerful creatine into your muscles for maximum strength and size-enhancing effects. ▲
